WEROSH KRIYANJALA

Associate Software Engineer (Front-End Focused)

Malabe, Sri Lanka | +94 76 949 6250
weroshprofy@gmail.com | linkedin.com/in/weroshk | github.com/Werosh | Portfolio Site

Professional Summary

Associate Software Engineer with strong experience in Front-End and Full-Stack Web Development. Proficient in Next.js, React.js, JavaScript and Firebase for building responsive, scalable, and high-performance web applications. Experienced in developing modern UI, integrating APIs, and working with cloud-based backends. Familiar with Agile development practices, version control with Git, and writing clean, maintainable, and well-structured code. Focused on performance optimization, usability, and delivering reliable, user-centered digital solutions.

Core Competencies

- Front-End Development (Next.js, React.js, Tailwind CSS, JavaScript, HTML5, CSS3)
- Back-End Integration (Node.js, Python, Java, Firebase)
- UI/UX Design Principles & Component-Based Architecture
- RESTful APIs & JSON Data Handling
- Performance Optimization & SEO Best Practices
- Git/GitHub, Version Control, CI/CD Awareness
- Mobile-First & Cross-Browser Compatibility
- Agile/Scrum Methodologies

Technical Skills
Languages:
JavaScript, TypeScript, Python, Java, PHP, C#, SQL, Bash/Shell Scripting

Frameworks & Libraries:
Next.js, React.js, Node.js, Express.js, FastAPI, Tailwind CSS, Redux, Bootstrap

Databases:
MongoDB, MySQL, Firebase Realtime Database, Firestore

Web Technologies:
HTML5, CSS3

Tools & Platforms:
Git, GitHub, VS Code, Firebase, Vercel, Netlify, Nginx, PM2, VPS (Linux), Agile

Other Skills:
MVC Architecture, Debugging, Chrome DevTools, Figma, CI/CD Pipeline Management, Performance Optimization

Professional Experience

Software Engineer - Ranga Technologies (PV00275991)
03/2026 - Present

- Led development of new frontend features, improving application functionality and user experience by 75%.
- Mentored junior developers and interns, increasing team code quality and onboarding efficiency by 40%.
- Conducted code reviews to maintain quality, reducing frontend bugs by 25% and improving maintainability.
- Collaborated in requirement discussions and technical design sessions, enhancing frontend implementation efficiency by 30%.
- Troubleshot production issues and implemented fixes, improving system uptime and reliability by 20%.
- Suggested and implemented UI/UX improvements based on analytics and client feedback, increasing user engagement by 15%.
- Coordinated with QA teams to define and validate frontend test cases, reducing post-release issues by 25%.
- Developed reusable components and modular frontend architecture, reducing development time for new features by 45%.
- Monitored application metrics and analytics to identify and fix bottlenecks, improving overall responsiveness by 25%.
- Coordinated with QA teams to define and validate frontend test cases, reducing post-release issues by 65%.
- Integrated third-party APIs and services, expanding platform capabilities and reducing manual tasks by 20%.

Tech Stack: Next.js, React, Tailwind CSS, FastAPI, Python, MongoDB, Redux, Context API, Git, Nginx, PM2, VPS (Linux), Agile, Figma

Software Engineer Intern (Front-End Focus) - Ranga Technologies (PV00275991)
09/2025 - 03/2026

- Developed and optimized responsive web applications using Next.js, React, Tailwind CSS, and modern JavaScript frameworks, boosting performance and responsiveness by 45%.
- Collaborated with the backend team using Python (FastAPI) to design and integrate RESTful APIs, improving data transaction speed by 30% and overall reliability.
- Worked with MongoDB for scalable data storage and optimized queries, reducing data retrieval time by 25% through effective indexing and schema structuring.
- Deployed and maintained applications on remote VPS servers, configuring Nginx, PM2, and SSL for secure, high-availability environments (99.9% uptime).
- Contributed to building AI-driven automation tools, enhancing workflow efficiency and analytics accuracy by 40% across client projects.
- Implemented Git-based CI/CD pipelines to manage version control, testing, and deployments-reducing release issues by 35% and accelerating delivery cycles.
- Utilized Redux and Context API for modular state management, reducing component redundancy by 25% and improving maintainability.
- Collaborated in an Agile development environment, helping the team deliver sprint goals 20% faster through structured task prioritization and review processes.
- Converted Figma prototypes into production-ready interfaces with 100% design fidelity, adhering to accessibility (WCAG) and responsive design principles.
- Developed and integrated RESTful API endpoints using structured JSON request and response bodies, improving frontend-backend data exchange efficiency by 35 percent and reducing integration errors by 20 percent.
- Structured scalable project architecture with modular services and utility layers, improving maintainability and reducing debugging time by 25 percent.
- Integrated third party APIs and external automation services, expanding platform capabilities and reducing manual operational work by 30 percent.
- Improved SEO and rendering performance using Next.js SSR and SSG strategies, increasing organic traffic potential and page indexing performance by 32 percent.

Tech Stack: Next.js, React, Tailwind CSS, FastAPI, Python, MongoDB, Redux, Context API, Git, Nginx, PM2, VPS (Linux), Agile, Figma

Head Web Developer - NextGen Websites (Australia, Remote)

2024 - Present

- Led the development of 15+ high-performance, scalable web applications for Australian clients, specializing in React, Next.js, and modern UI frameworks.
- Architected end-to-end solutions integrating AWS services, APIs, and third-party platforms, boosting system efficiency by 35%.
- Directed a cross-functional team of 6 developers and 4 designers, improving delivery timelines by 25% through agile sprints and clear task prioritization.
- Implemented advanced performance optimization techniques such as server-side rendering (SSR), static site generation (SSG), and CDN-based asset delivery, resulting in up to 60% faster page loads.
- Established coding standards, reusable component libraries, and CI/CD pipelines, reducing bugs in production by 40% and speeding up deployment cycles.
- Managed client relationships, requirements gathering, and project roadmaps for 10+ concurrent projects, achieving a 98% client satisfaction rate.
- Mentored junior developers in front-end best practices, state management, and modern deployment workflows, fostering skill growth and team efficiency.

Senior Web Developer - Nebula Arcs

2024 - 2025

- Developed and maintained 22+ complex web applications using React, Tailwind CSS, and Node.js, enhancing user experience and system performance.
- Collaborated closely with UI/UX designers to implement pixel-perfect, responsive designs that increased customer retention by 30%.
- Optimized front-end code for speed and SEO, cutting page load times by 45% through code splitting, lazy loading, and image optimization.
- Built reusable component libraries and custom hooks, accelerating development speed by 20% across multiple projects.
- Integrated RESTful APIs and third-party services, ensuring seamless data flow and robust backend communication.
- Provided mentorship and code reviews for a team of 5 developers, promoting best practices and continuous learning.
- Coordinated with product managers and clients to translate business requirements into technical solutions, delivering projects on schedule with 97% client satisfaction.

Freelancer - Full-Stack Developer (Front-End Focused)

2024 - 2026

- Built 10+ full-stack web applications using React for frontend and Firebase services for backend functionalities such as authentication, real-time database, and cloud functions.
- Increased user engagement by 40% by designing intuitive, mobile-first, responsive UIs that improved navigation and accessibility.
- Enhanced SEO and decreased page load times by 50%, leveraging code optimization techniques like tree shaking, image lazy loading, and asynchronous data fetching.
- Developed and documented reusable React components and custom hooks, improving code maintainability and accelerating development cycles by 25%.
- Collaborated with a team of 4 UI/UX designers and 3 backend Firebase engineers to deliver 5+ seamless end-to-end web solutions, improving project delivery speed by 20% through agile workflows.
- Managed project timelines and client communications for 6+ projects simultaneously, prioritizing features to achieve a 95% on-time delivery rate and meet all client requirements.

University of Moratuwa - Head Front-End Engineer

2024 - Present

- Led frontend development for 5+ university software projects including academic portals and research management systems.
- Cut the time users wait for pages to appear by over 60% by changing how the app loads content and reducing the size of images and code.
- Mentored and trained a team of 8+ junior developers on React best practices, component architecture, and Git version control, improving team productivity and code quality.
- Coordinated cross-functional teams of 5+ members to implement responsive designs, achieving 100% accessibility compliance across desktop, tablet, and mobile browsers, enhancing user experience for 500+ users.
- Conducted code reviews and implemented continuous integration pipelines to enforce coding standards and reduce bugs by 30%.
- Presented frontend solutions and progress updates biweekly to faculty and 10+ stakeholders, enabling timely feedback and securing project buy-in that accelerated development by 15%

Education

Bachelor of Information Technology
University of Moratuwa, Sri Lanka
Expected Graduation: 2027

- Major: Software Engineering
- Minor: Machine Learning

Higher National Diploma in Information Technology
University of Moratuwa, Sri Lanka
Completed: 2026

Major: Software Engineering
Minor: Machine Learning

Diploma in Information Technology
University of Moratuwa, Sri Lanka
Completed: 2025

Major: Software Engineering
Minor: Machine Learning

Projects

- **Boarding Finder** - Led a group project addressing real-world student accommodation challenges, delivering a scalable solution adopted by 100+ students to streamline housing searches and bookings
- **GowiKamituwa** - Developed a social media and consultation platform for farmers using React, Next.js, and Firebase, enabling community engagement and expert advice to improve farm management and decision-making.
- **BusMateLK** - Developed a real-time bus tracking app using React, Firebase, and Tailwind CSS, improving commuter experience for 600+ daily users with live location updates and route optimizations.
- **LassanaMoments** - Led frontend architecture for an event planning platform

Certifications

- **Meta Front-End Developer Certificate – Coursera *(In Progress)***

Achievements & Impact

- Improved average web app performance score from 60 to 90+ (Lighthouse). Cut development time by 30% through reusable code libraries.
- Recognized as “Top Contributor” in multiple university group projects.

Soft Skills

Led a cross-functional team of 5 developers to deliver a complex project 2 weeks ahead of schedule by coordinating tasks and fostering collaboration.

(Team Leadership + Time Management)

Resolved critical bugs by analyzing root causes and implementing solutions, reducing system downtime by 30%.

Facilitated weekly client meetings and delivered clear project updates, improving stakeholder satisfaction and alignment.

(Communication)

Mentored junior developers through code reviews and pair programming, accelerating their onboarding and productivity.

(Mentoring)
